Art Unit: 1625

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, drawn to a method of treating a condition which can be alleviated by antagonism of an EP4 receptor wherein the compound contains N in Y and the corresponding pharmaceutical compositions, classified in class 514, subclass 471 e.g.
- II. Claims 1-6 and 10-17, drawn to a method as above wherein the compound does not contain N in Y, classified in class 514, subclass 461 e.g.
- III. Claims 19-33, drawn to compounds where Y contains N, classified in class 559, subclass 491.
- IV. Claims 19-24 and 28-33, drawn to compounds where Y doesn't contain N, classified in class 549, subclass 484.

The inventions are distinct, each from the other because of the following reasons:

Note that the compound claims are of huge scope with respect to variables Y, R3, R5 and A. Note the proviso excluding certain compounds when Y is CH₂O. Note that the pharmaceutical composition and pharmaceutical method of use claims do not have the above proviso. Thus the compounds are independent and distinct therefrom.

Thus restriction for the above reasons buttressed by the differing searches involved is proper.

In the event that no generic claim is found allowable election of a single species is now required.

Art Unit: 1625

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
